## 150W DALI + PUSH+NFC Dimming power supply

## Description

FMS-150-800 N-S DALI-2 LN is a 150W constant current LED driver that operates from 198-264Vac input with 200 to 800 mA output current and a forward voltage range from 64 to 300 Vdc . The output current is adjustable by NFC. With it's compact dimensions from $360 \times 30 \times 21 \mathrm{~mm}$ it is easy to integrate in linear light products. To ensure trouble-free operation, protection is provided against output short circuit and over Load.

## Note:

1.The factory default brightness is at $100 \%$.
2.Up to 30 drivers can perform the PUSH dimming at the same time when utilizing one common push button
3.The maximum length of the cable from the push button to the last driver is 200 meters.

## Corridor mode

- (1)Fade-in time(0.5s): the time that starts as soon as the presence of a person is detected. During the fade-in time the luminous intensity is faded up to the presence value.
- (2Run-on time(120s): the time that starts as soon as the presence of a person is no longer detected. If the presence of a person is detected again during the run-on time the run-on time is restarted from zero. If no presence is detected during the run-on time the fade time is started as soon as the run-on time expires.
- (3)Fade time(32s): the time during which the luminous intensity is faded from the presence value to the absence value.
- (4)Switch-off delay (Never Off): the time during which the absence value is held before the lighting is switched off. Depending on the profile selected the switch-off delay may have different values or may not be defined.
- (5)Absence value(default: $10 \%$ ): the luminous intensity when there is no person present.
- (6Presence value (default: $100 \%$ ): the luminous intensity when persons are present.
