## 35W DALI + PUSH Dimming power supply

## Description

FMS-35-700 DALI-2 LD is a 35W constant current LED driver that operates from 198-264Vac input with 150 to 700 mA output current and a forward voltage range from 15 to 51 Vdc . The output current is adjustable by dip-switch. With it's compact dimensions from $280 \times 30 \times 21 \mathrm{~mm}$. It is easy to integrate in linear light products. To ensure trouble-free operation, protection is provided against output short circuit and over Load.

| Note | 1.All parameters NOT specially mentioned are measured at 230 VAC input , full load and $25^{\circ} \mathrm{C}$ of ambient temperature. <br> 2.Ripple \& Noise are measured at 20 MHz of bandwidth. <br> 3.The DC input for this product is only used for emergency lighting and applies to functional and safety requirements, EMC is not considered. <br> 4.DALI protocol comprises 16 groups and 64 addresses.Up to 32 drivers can perform the PUSH dimming at the same time when utilizing one push button. <br> 5.Unload voltage Max. is measured 5 seconds after power-on. <br> 6.EL compatible with IEC 61347-2-13 Annex J, compatible with EN 60598-2-22 emergency lighting fixtures, compatible with EN 50172 central battery system applications. <br> 7.All Eaglerise power supply are complied with EMI regulations. Since they are belong to component and will be installed inside system enclosure. When they are integrated into a system, the EMI characteristics of the system must be re-verified again. |  |

## Remarks:

1.The number of drives mounted under different MCBs in the table is the maximum value. Please do not exceed this number during installation.
2.Different brands and models of miniature circuit breakers, the number of drives mounted will be slightly different.

## Push dimming operation

| Action | Action duration | Function |
| :--- | :--- | :--- |
| Short push | $<0.5 \mathrm{~s}$ | Turn on/off |
| Short push |  |  |
| twice | $<0.5 \mathrm{~s}$ | LED on: Save current brightness level <br> LED off: Delete saved level and turn on at 100\% brightness |
| Short push five <br> times | $<3 \mathrm{~s}$ | Quit Corridor mode |
| Long push | $0.5-14 \mathrm{~s}$ | Dimming up or down |
| Long push | $15 \mathrm{~s}-2 \mathrm{mins}$ | Sync all LEDs to be 100\% brightness |
| Long push | $>2$ mins | Thter Corridor mode - LED keep 100\% brightness for 2mins. <br> Then brightness will turn to be 10\% within 32s if no action during 2mins |

## Note:

1.The factory default brightness is at $100 \%$.
2.Up to 30 drivers can perform the PUSH dimming at the same time when utilizing one common push button
3.The maximum length of the cable from the push button to the last driver is 200 meters.

## Corridor mode

( (1)Fade-in time(0.5s): the time that starts as soon as the presence of a person is detected. During the fade-in time the luminous intensity is faded up to the presence value.

- (2Run-on time(120s): the time that starts as soon as the presence of a person is no longer detected. If the presence of a person is detected again during the run-on time the run-on time is restarted from zero. If no presence is detected during the run-on time the fade time is started as soon as the run-on time expires.
- (3)Fade time(32s): the time during which the luminous intensity is faded from the presence value to the absence value.
- (4)Switch-off delay (Never Off): the time during which the absence value is held before the lighting is switched off. Depending on the profile selected the switch-off delay may have different values or may not be defined.
- (5)Absence value(default: $10 \%$ ): the luminous intensity when there is no person present.
- (6Presence value (default: $100 \%$ ): the luminous intensity when persons are present.
